[nayanamana@yahoo.com](mailto:nayanamana@yahoo.com)

## Summary

---

Detailed oriented privacy/security professional with 6 years of exposure to academic research, and 15+ years of experience on roles pertaining to software, system, and site reliability engineering. Excellent communicator, critical thinker, and thrives in fast-paced and challenging environments, where accuracy and efficiency matter.

## Skills

---

Python | Perl | C# | JavaScript | NodeJS | HTML | CSS | AngularJS | XML | Bash | UNIX | SQL | Machine Learning | Wireshark | Burp Suite | Nmap | Kali Linux | OWASP | VirusTotal | Selenium | SSL/TLS | Distributed Systems | HTTP | JSON | GRPC | Ansible | Micro services | AppDynamics | Observability | Grafana | Tempo | Prometheus | Jaeger | TCP/IP | Splunk | Azure | DAST | SAST | Cloud computing | ServiceNow | NumPy | DNS | DB2 | MySQL | Apache | Tomcat | Git | Agile | Scrum | SDLC | Unit Testing | Penetrating Testing | DevOps | Cryptography | Encryption | OOP | Docker | Kubernetes | Data Structures | Algorithms | CI/CD

## Professional Experience

---

**Application Performance Specialist/SRE**      [Morgan Stanley](#)      **Montreal, Canada**      **09/2011 – Current**

- Designed/developed applications (e.g., CMS/REST APIs), allowing easy integrations with firm's systems.
- Deployed scalable infrastructure (e.g., Docker, Kubernetes in private/public cloud), increasing efficiency of deployments.
- Lead the team to migrate vendor specific Application Performance Monitoring (APM) products (e.g., AppDynamics) to opensource solutions (e.g., Observability) for monitoring of distributed systems, saving \$1,000,000+ to the firm.
- Coordinated between teams to develop authorization/entitlement models, improving the security of firm's systems.
- Built Splunk operational dashboards, that enhanced the visualization of health in monitored applications (for stakeholders).
- Decommissioned 3 legacy systems, and replaced them with the state-of-the-art, eliminating risks from potential security issues (e.g., zero-day vulnerabilities), and minimizing technical debt.

**Researcher (Security/Privacy)**      [CIISE, Concordia University](#)      **Montreal, Canada**      **09/2017 – 04/2023**

- Researched on privacy issues (tracking, session replay) in online services (websites, Android apps) --- observed more than 4% of analyzed hospital websites expose PII, and are non-compliant with privacy regulations (e.g., GDPR, CCPA, HIPAA).
- Tested essential websites and examined networked devices using vulnerability scanning/network monitoring tools --- found vulnerabilities (e.g., XSS, SSRF, SQL Injection) in 400+ websites, and weak ciphersuites used for TLS in networked devices.
- Implemented 6 tools to identify security/privacy issues in websites/mobile apps, and [open-sourced](#) to the community.
- Published research findings at top-tier conferences (TheWebConf, CCS), on the exposure of PII, from government websites/Android apps and 23% of evaluated Android apps that use custom encryption --- **see a list of publications [here](#).**

**Programmer Analyst**      [NTT Data](#)      **Halifax, Canada**      **09/2005 – 08/2011**

- Developed tools and supported the monitoring of large-scale applications/infrastructure, and reduced the mean time to resolution (MTTR) of outages by 75% --- also performed debugging/troubleshooting of system issues.

**Senior Software Engineer**      [Virtusa](#)      **Colombo, Sri Lanka**      **02/2000 – 09/2002**

- Increased the efficiency (60%) of business operations of high-profile clients, by designing/developing/integrating/deploying large-scale applications (e.g., client server systems, web applications) --- to automate business processes.

## Education

---

- **Doctor of Philosophy**      [Concordia University](#)      Montreal, Canada      **09/2017 – 11/2022**  
*Information and Systems Engineering (Security/Privacy)*
- **Master of Engineering**      [Concordia University](#)      Montreal, Canada      **09/2015 – 12/2016**  
*Information Systems Security*
- **Master of Science**      [University of Ottawa](#)      Ottawa, Canada      **01/2004 – 09/2005**  
*Computer Science*
- **Bachelor of Science**      [University of Colombo](#)      Colombo, Sri Lanka      **05/1995 – 09/1999**  
*Computer Science*

## Certifications

---

Microsoft Certified: Azure Fundamentals | Certified Information Privacy Professional/United States (CIPP/US) | Certified Information Privacy Manager (CIPM) | Information Technology Infrastructure Library (ITIL) – V2
